Type of limit	Emission Limit Citation	FE Y/N	Emission Limit	Monitoring Requirement Citation	Monitoring Frequency	Monitoring Type or Compl. Method	Continuous Compliance?
Sulfur Limit	Regulation 9-1-304	Y	Fuel Sulfur Limit 0.5% (liquid fuels)	Regulation 9-1-501	P/E	Vendor Certification or BAAQMD approved laboratory analysis	Yes

* As the BAAQMD is aware, S95 and S96 were previously operated under the low fuel usage limited exemption of Regulation 9-7-112 as backups to United's Cogen plant, consisting of S-195 (Combustion Turbine) and S-196 (Duct Burner). In March 2012, under Application No. 24102, the District allowed United to convert the boilers from backup to full time operation after United decommissioned its Cogen plant. As a result of losing their low fuel usage limited exemption of Regulation 9-7-112, S95 and S96 became subject to the emissions standards in Regulation 9-7-307.6 within 24 months from when S95 and S96 lost eligibility for the exemption.

Test results from startup on February 5, 2014 demonstrated compliance with the applicable emissions standards in Regulation 9-7-307.6. Source tests under the periodic testing requirement of Regulation 9-7-506 were not required to be completed within this reporting period. United will comply with this requirement by performing the required periodic source testing in accordance with Regulation 9-7-601 and Regulation 9-7-602 during the next reporting period.

² Units S195 and S196 are currently listed as permitted emission units under the SFMC's Title V Operating Permit #A0015. As the BAAQMD is aware, the facility stopped operating the combustion turbine, including the CEM, and the duct burner in January 2012. The equipment has not been operated since that time. In May 2013, United requested cancellation of the permit to operate for S195 and S196. The CEM is the prescribed monitoring requirement for NO_x and CO emissions for these units. However, because these units were not in operation during this reporting period, there were no NO_x or CO emissions for the CEM to measure during this reporting period.

Defective Component Repair Time Limit	Regulation 8-7-302.4	Y	Must be repaired or replaced within 7 days	Regulation 8-7-503.2	N	Recordkeeping	Yes
Liquid Removal Rate	Regulation 8-7-302.8	Y	≥ 5 ml per gallon dispensed, when dispensing rate > 5 gallons/min.	None	N	Use CARB Certified System	Yes
Liquid Retain from Nozzles	Regulation and SIP 8-7-302.12	Y	≤100 ml per 1000 gallons dispensed	None	N	Use CARB Certified System	Yes
Nozzle Spitting	BAAQMD Regulation and SIP 8-7-302.13	Y	≤1.0 ml per nozzle per test	None	N	Use CARB Certified System	Yes
Pressure-Vacuum Valve	Regulation 8-7-316	Y	Pressure Setting: Less than 2.5 in w.c.	Regulation 8-7-316	N	P/V valve setting	Yes

⁴ The Title V Operating Permit Table VII-L references Condition #18135, Part 3 (Type of Limit - Organic Compounds). However, Condition #18135 is no longer in United's current Permit. Condition #18135 appeared in the previous version of the facility's Title V Operating Permit (which was issued in 2003) and enumerated the requirement for Static Pressure Testing, along with other requirements. Such requirements are now listed in Condition #25107 of the facility's annual renewal permits to operate.
